

## *Press Release*

October 4, 2007

### **NORAC Systems International Inc. Official Grand Opening**

On June 25, 2007 NORAC Systems International Inc. opened its new office and manufacturing facility in the Marquis Industrial area of Saskatoon. This move comes less than two years after completing the relocation of its US Division, NORAC, Inc. Both moves were deemed necessary by NORAC Management to facilitate significant business growth over the past several years. This growth has been realized through several NORAC products and markets, but most significantly in the UC4 Spray Height controller and the Mobile Group Animal Scales.

The new manufacturing facility allows for more efficient, high volume production of NORAC's core products. The office space is more efficient as well, with more room for present staff and new employees.

"We had simply outgrown both of our existing facilities", said Bill Strelieff, CEO. "The increased efficiency with the ability to produce in much higher volumes has eliminated a major barrier to our continued growth. We sincerely thank our loyal customers and employees for making this a possibility!"

Please accept this special invitation to help us celebrate the Grand Opening of our new Canadian headquarters. The Grand Opening celebration will take place on Thursday, October 11<sup>th</sup> starting at 3:00 pm. A ribbon cutting ceremony will highlight a presentation of the Mayor's Thanks a Million award by Councillor Wyant at 3:30 p.m.
