

Unprecedented Spray Height Accuracy.

NORAC  Customer Profile

Sprayer:	Hardi 4200 Commander Plus Twin Force 24m
Featured Sprayer:	NORAC Standard UC4+™ Spray Height Controller

“... we now find we can spray faster without worrying that the boom might hit the ground.”

Charles Edgley owns a 2007 Hardi 4400i Commander with a Twin Force 24m boom that features NORAC's UC4+™ Spray Height Controller. He previously had one of NORAC's standard UC4™ Spray Height Controller systems on a 2003 Hardi 4200 Commander Plus with a Twin Force 24m boom.

According to Mr. Edgley, *“Our farm is on very undulating land and we wanted a system to take some of the stress out of spraying so we don't have to continuously alter the boom settings on the sprayer joystick. The NORAC has made the whole job much easier and we now find we can spray faster without worrying that the boom might hit the ground.”*
