

Unprecedented Spray Height Accuracy.

Sprayer:	Goldacres 3200 Crop Cruiser
Featured Sprayer:	NORAC Standard UC4™ Spray Height Controller

“It worked better than expected from the time it was first turned on”.

Peter & Sharnie Farrell from Pallamallawa, NSW, Australia recently purchased a new sprayer and had it fitted with the NORAC UC4™ Spray Height Control System. The sprayer is a Goldacres 3200 Crop Cruiser and has a 36m boom. Peter wrote us with his comments:

According to Mr. Farrell, “I used it for the first time yesterday in some hilly and contour country and was very happy. I would like to congratulate you guys. We use a lot of hi-tech gear (spot spray system, weather stations, auto steering, automatic boom section shut off) and this is the first hi-tech electronic system that I have ever had that has worked very well; in fact it worked better than expected from the time it was first turned on. I have been operating sprayers as a contractor for nearly 20 years and am extremely happy with the operation of the NORAC system.”
