**NORAC Expands U.S. Division**  
 Minnesota Ag Connection - 04/08/2011

NORAC, Inc. is pleased to announce the expansion of its U.S. operations. The new facility located in Bloomington, MN doubles NORAC's US office and warehouse space.

This move was deemed essential by NORAC's Management Team to facilitate future business growth. This growth has been realized through several NORAC products and markets, but most significantly in the Spray Height Control system product line and the Mobile Group Animal Scales.

The new facility allows for more efficient, high volume warehousing of NORAC's core products. The office space offers more room for staff and new employees.

"We had simply outgrown our existing U.S. office and warehouse facility," said Bill Strelieff, CEO. "The increased capability to move higher volumes has eliminated a major barrier to our continued growth. We sincerely thank our loyal customers and employees for making this a possibility."

NORAC Systems International Inc. is a Canadian-based agricultural electronics manufacturer with offices in Canada, the United States and Europe.
